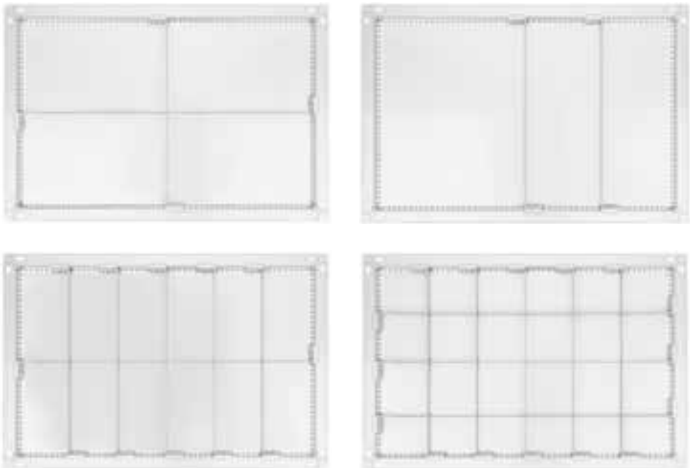
## to clip on

ClipOn effect
Fixed connection between divider and modular tray

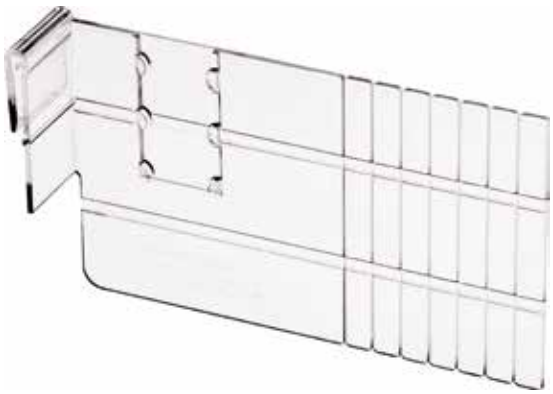
One for all
The H+H ISO divider can be used in all 3 modular tray variants (FlexTray, FlexBasket, FlexModul). Fast and flexible are essential features for the organisation and storage of medication and healthcare products.



### Many subdivision options

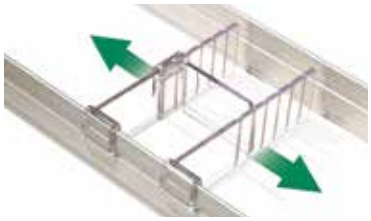
The H+H ISO dividers offer many options for the storage of various products. The lane width is adjustable every 10 or 20 mm. This way, each lane can be adapted to each product.

Zyrtec 10 mg
Symbicort 160
Tacholiquin
Lamictal
Simvatin 40 mg Filmtabletten



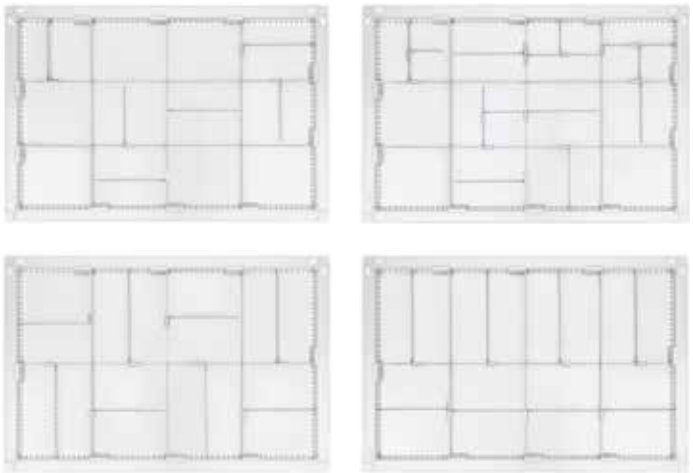
# H+H sliding divider

## Endless flexibility



Continuously adjustable
The flexible sliding divider is easy to adjust and can be moved directly next to the product.

Whether in the FlexModul, in the FlexTray or in the FlexBasket – the sliding divider creates up to 30% more space. Integrated label holders ensure even more space saving organisation and an optimal overview.



### Infinite subdivision options

With the combination of flexible H+H sliding dividers and H+H ISO dividers, the storage system is optimised to perfection. This way each single compartment can be adapted to each product – a unique market solution to gain space.

# The H+H ISO modular trays

## 3 variants, each with specific advantages

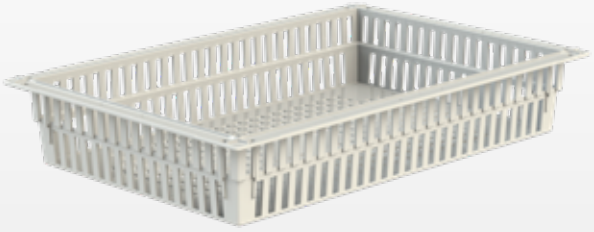
H+H FLEXTRAY

### H+H FlexTray

Hygienic and sturdy
Perfect for items containing liquids

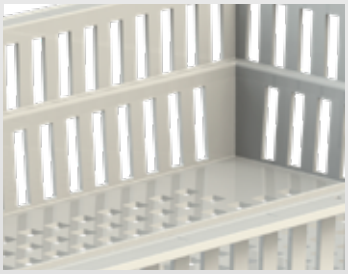
The benefits are straight forward:
The closed H+H FlexTray is completely leakproof. Therefore, it is particularly suitable for storing items that contain liquids. If something leaks, the tray is easy to clean: Like all three modular trays, the H+H FlexTray can be put into the dishwasher, ensuring the best possible hygiene.

H+H FLEXBASKET



### H+H FlexBasket

Sturdy despite minimal weight
Air permeable with optimal insight



The benefits are straight forward:
Especially when filled, the weight of the modular tray alone can play a big role - for example if the full modular tray is to be moved to a different location. Here, every gram counts. The H+H FlexBasket is helping to keep the overall weight minimal, although robust design achieves strong storage with an optimal overview of the items inside.

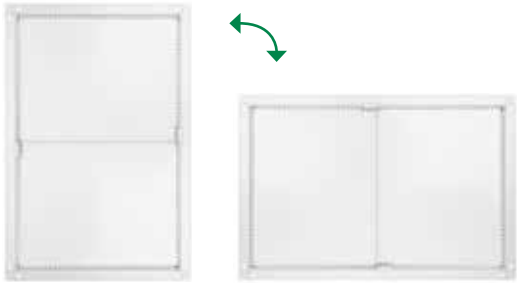
H+H FLEX MODUL®

## H+H FlexModul

The bestseller among the modular trays
A combination of tray and basket

The benefits are straight forward:
The design of the H+H FlexModul is patented for a good reason: It combines the advantages of the H+H FlexTray and the H+H FlexBasket. This unique solution thus became our best-selling variant. Leakproof at the bottom and robust with an optimal overview - the H+H FlexModul is definitely our highlight in terms of utility and flexibility.

All have one thing in common:
**Combined with the H+H ISO dividers and H+H sliding dividers, the ISO modular trays save up to 30% space**



The H+H ISO modular trays can be used lengthwise and crosswise

## ISO format
600 x 400 mm

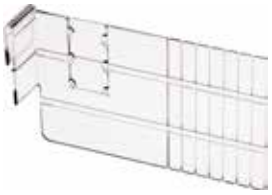
Transparent or grey

# The H+H ISO modular tray system
## analysed in detail

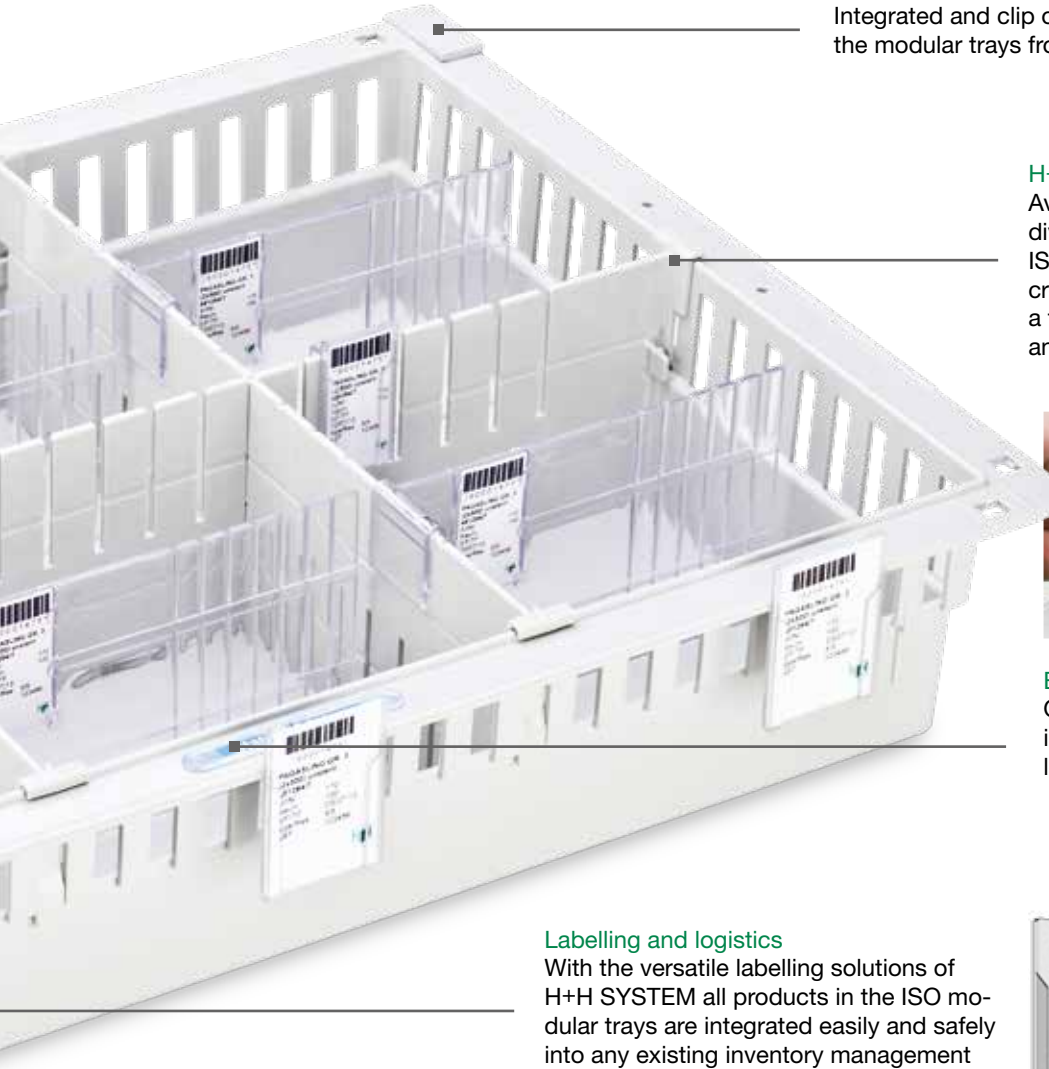
### No agony of choice
Each of the three variants H+H FlexModul, H+H FlexBasket and H+H FlexTray has its own individual advantages. Therfore, choosing one of the three modular trays is not a difficult task.

### Maximum usable space
The patented shape allows to use the maximum space of the modular tray‘s bottom.

### H+H sliding divider
The star of all H+H dividers comes with various features, such as the integrated label holders for an even better overview.



### Stackable
All ISO modular trays can be nested together easily.



### Pull out stopper
Integrated and clip on stoppers prevent the modular trays from falling out.

### H+H ISO dividers
Available in grey or transparent, the dividers are inserted easily into the ISO modular tray lengthwise and crosswise. The ClipOn effect ensures a fixed connection between divider and modular tray.

### Branding
Optional labelling plates can be individually printed with a customer logo or the hospital station.

### Labelling and logistics
With the versatile labelling solutions of H+H SYSTEM all products in the ISO modular trays are integrated easily and safely into any existing inventory management system.

### Various materials
The ISO modular trays are available in ABS grey or PC transparent, depending on variant and size.

# Supporting systems
# Full extension runner

Available in standard or silent version, the full extension runner is suitable for all three types of ISO modular trays. With a load capacity of up to 70 kg, even heavy objects can be pulled out effortlessly. The inclined full extension runner is ideal for high cabinets while the pass-through full extension runner can be pulled out on both sides.

Strong
**accessories**

ISO frame for hanging files

ISO frame for catheter basket

ISO tube holder

# **Ergonomic work** thanks to quick height-adjustment

The full extension runner offers many possibilities for organisation. All H+H ISO modular trays are exchanged effortlessly with a flick of the wrist. If the height of a modular tray no longer fits, the full extension runner is adjustable every 14 mm - without tools. This makes ergonomic working easy!

# S Supporting systems
## Side panels

The side panels made of durable plastic are easy to use: The ISO modular trays are simply slid into the side panels and exchanged as required. Due to the minimal distance between slots (32 mm), maximum storage capacity can be achieved. The integrated stop function prevents the modular trays from falling out. For ergonomical working all modular trays in the side panel can be hinged down or passed through on both sides ot the cabinet.

1. Straight stopping function
2. 30° hinged stopping function
3. Pass-through feature
4. Optional roller wheels

Strong
**accessories**

ISO shelf wood

ISO tray ABS grey

Catheter runner with shelf

# Side panel and full extension runner

## A powerful team

The side panels provide increased storage capacity due to the small distance between the “ribs”. Easy to install, the panels are extendable by any number of side panels thanks to their shape. In addition, one and the same side panel can be used as a left or right one. In combination with the full extension runner the possibilities for optimal storage are unlimited.

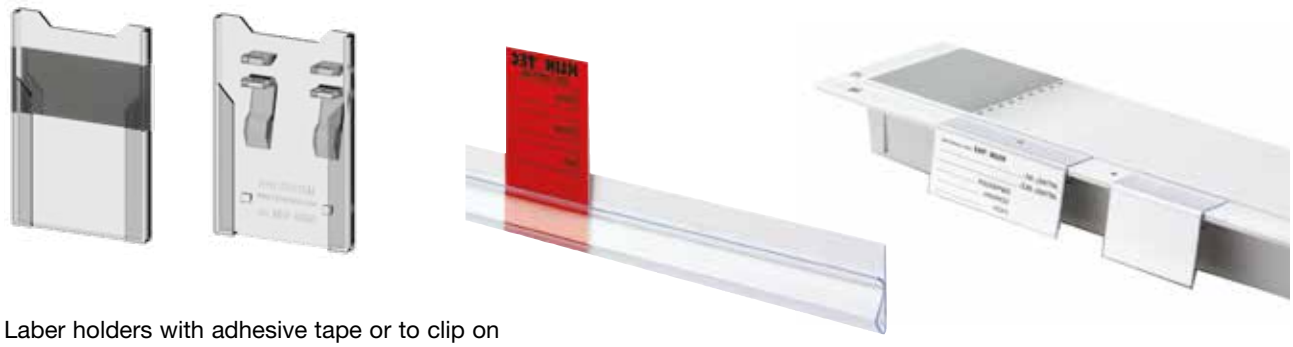
# Accessories, labelling and logistics
for ISO modular trays

## Safety
comes first

ISO lids and tearaway seals
In grey or transparent plastic, the ISO lids ensure maximum security in combination with the optional tearaway seals.

# **Wide range**
## of labelling options

Easy organisation of all products is guaranteed with our labelling system. The labelling options provide a quick overview and clear visibility. As a logistics tool they help to optimise the supply chain management. Label holders with adhesive tape or to clip on can be attached directly to the product and thus contribute significantly to avoiding errors.



Laber holders with adhesive tape or to clip on and labelling rails in many designs

**Perfect overview**

1. Label holders to clip on ISO dividers
2. Label holders integrated into sliding dividers
3. Label holders with clip for modular tray front

# Proven in use
## The ISO modular tray system

The people who work with our products are still the best practical test. After all, only in practice you will see how well a system works. That‘s why we are proud that hospitals, nursing homes and other healthcare facilities all over the world trust in our modular tray system. Quality, reliability and service are our standards.

## Reliable
## **in every situation**

# Versatile usage
## in the cabinet, cart or shelf

The ISO modular trays are perfect for many areas of application: They ensure lasting organisation in the cabinet as well as in the cart or on the shelf. Thus, only one system is necessary to cover all important storage areas. Also our H+H dividers are suitable for all fields.

H+H FLEXSHELF®

## Modular storage system

You can equip entire rooms and departments easily with the specially developed H+H FlexShelf. In combination with the ISO modular tray system the possibilities are practically unlimited. For individual solutions try our 3D Planner and design your own storage system.

# KLINOTEC Modular tray system
## in DIN format

Cabinets with external dimensions of 600 x 600 mm are perfectly organised with the modular trays in standardised DIN format. Seamlessly molded extension stops prevent the modular trays from falling out. With the H+H sliding dividers, the DIN modular tray system is absolutely flexible and space saving. Both versions, gray and transparent, are leakproof and impact resistant.

### DIN format
538 x 500 mm

**Perfect overview – leakproof, resistant to scratches and other impacts**
